

SYED WASI UL HASSAN

FULL-STACK DEVELOPER

PROFILE

React Native developer with hands-on experience building full-stack mobile applications, real-time features, and backend-integrated systems. Currently transitioning into web development and AI engineering, building production-style projects with Next.js, TypeScript, Node.js, and PostgreSQL, including a deployed AI chatbot platform integrating the Gemini API. Comfortable working across the full stack, from UI to database to third-party API integration, and eager to apply this range to web and AI-focused engineering roles. Open to remote and on-site opportunities.

SKILLS & STRENGTHS

React Native	Next.js	TypeScript
JavaScript	Tailwind CSS	Node.js
PostgreSQL	REST APIs	Firebase
Socket.io	Gemini API	API Testing
SQL	Git / GitHub	Figma

EXPERIENCE

Full-Stack Web Developer (Intern) | Zynvex Solutions — Remote

Next.js, TypeScript, Node.js, PostgreSQL | Aug 2026 – Present

- Working as a remote full-stack intern, contributing to web application development using Next.js, TypeScript, Node.js, and PostgreSQL.
- Collaborating with the team on frontend and backend feature development within a live production codebase.

Mobile App Developer (Internship) | Developerhub Corporation — Social Media App

React Native (Expo), Firebase, Node.js, Socket.io

- Built a cross-platform social media app with a real-time feed, image uploads (Cloudinary), and like/comment interactions using Firestore live listeners.
- Implemented follow/unfollow, username-based search, real-time one-to-one chat (Socket.io), and a Firestore-based notification system with global state via Zustand.

PROJECTS

Sluuni — AI Chatbot Platform

Tools: Next.js, TypeScript, Tailwind CSS, Node.js, PostgreSQL, Gemini API

Live: anthropic-chatbot-two.vercel.app

- Built a full-stack, text-based AI chatbot platform with multi-user authentication, a public landing page, and persistent multi-session chat (new chat, logout, resume history) stored in PostgreSQL.
- Integrated the Gemini API to power model responses — a foundation for further work in agentic AI, RAG, and semantic search.

Personal Portfolio Website

Tools: Next.js, TypeScript, Tailwind CSS

- Designed and built a personal portfolio site with a responsive, component-based UI to showcase projects and skills.

Van Pooling Management System — Final Year Project

Tools: React Native, Node.js/Express, Real-Time Database

- Developed a cross-platform school transport app (React Native) with a Node.js/Express backend and real-time GPS tracking.
- Built police-verified driver onboarding, guard-verification, parent-driver ratings, and secure handover/trip monitoring.

EDUCATION

Bachelor of Software Engineering

Barani Institute of Information Technology
2022 – 2026 | GPA: 3.63 / 4.0

Intermediate in ICS

AL-Beruni Govt. Degree College, Pind Dadan Khan
2020 – 2022

CORE SKILLS

Mobile App Development
Full-Stack Web Development (Next.js)
REST API Integration
Database Design (PostgreSQL, Firestore)
LLM API Integration (Gemini API)

CURRENTLY LEARNING

Agentic AI Systems
RAG (Retrieval-Augmented Generation)
Semantic Search
AI Automation (e.g. email workflows)

LANGUAGES

Urdu — Native
English — Professional
