SKILLS

- React Native
- API Integration
- Mobile Application Development
- Node.js
- SQL
- PostgreSQL
- REST APIs
- Figma
- Github
- API Tester
- MAP Integration

PROFILE

Junior React Native Developer with practical experience in mobile app development, REST API integration, and backend communication. Familiar with React Native, JavaScript, Node.js, and database handling. Eager to grow professionally and contribute to real-world software and web projects while continuously improving development skills.

WORK EXPERIENCE

- **Van Pooling Management System App**
 - Developed a cross-platform mobile app (React Native) for school van pick-up/drop management, with a Node.js/Express backend and real-time database integration.
 - Implemented live GPS vehicle tracking, letting parents and school admins monitor van location in real time.
 - Built police-verified driver onboarding and a guard-verification module confirming safe student boarding, school arrival, and return-home.
 - Added parent-driver rating, secure child handover/departure verification, trip monitoring, attendance tracking, and transportation fee payment management.
 - Collaborated across the full lifecycle — requirement analysis, system design, development, testing, and deployment.
- **SocialConnect — Social Media App | React Native (Expo), Firebase, Node.js, Socket.io | Internship Project**
 - Developed a cross-platform social media app (React Native/Expo) with Firebase Firestore and Authentication, and Cloudinary for media storage.
 - Built a real-time social feed with post creation, image uploads, like/dislike interactions, and threaded comments using Firestore live listeners.
 - Implemented a follow/unfollow system with live follower/following counts and a personalized profile experience for each user.
 - Designed a real-time notification system (Firestore + Socket.io) delivering instant like, comment, and message alerts, with offline push notification fallback via Expo.
 - Built a real-time one-to-one chat feature with typing indicators, unread message tracking, and a conversations list, powered by Socket.io and Firestore.
 - Added post management (edit/delete) and username-based search, with state managed globally using Zustand for a responsive, optimistic-update UI.
- **Flashcard Quiz App | React Native**
 - Built a flashcard quiz app with a flip-to-reveal answer flow and self-assessment (correct/incorrect) tracking.
 - Implemented session-based scoring and a results screen showing accuracy and performance stats.
 - Designed a simple, intuitive UI focused on fast review and recall practice.
- **Random Quote Generator | React Native (Expo)**

Random Quote Generator (React Native/Expo) — Displays random quotes with author info from a curated 300+ entry offline dataset.

EDUCATION

- | | |
|--|-------------|
| Intermediate in ICS | 2020 - 2022 |
| AL-Beruni Govt. Degree Collage Pind Dadan Khan District Jehlum | |
| Bachelor of Software Engineering | 2022 - 2026 |
| Barani Institute of Informations Technology | |
| GPA: 3.63 / 4.0 | |
